

Corporate Environmental Services Inc.

EHS & Regulatory Compliance Services

Corporate Environmental Services Inc. (CES) specializes in providing personal attention and high-quality environmental health and safety (EHS) consulting, due diligence and regulatory compliance services to private sector clients throughout the Mid-Atlantic Region.

CES is widely recognized for serving business and industry by solving problems related to environmental health and safety issues, minimizing our clients' liabilities and ensuring compliance with State and Federal regulations in a cost-effective manner. CES has completed a wide range of EHS, civil and process engineering projects for small and large companies and organizations across the Mid-Atlantic.

Please let us know how we can help you achieve your EHS compliance goals.

Virtual Staffing

Many of our clients utilize CES as an ongoing adjunct to their in-house resources with a mix of on-site and remote EHS technical support.

Due to the complexities of EHS compliance, client downsizing, or other business considerations, CES has assisted by providing "virtual" staff at client sites.

In some situations, these needs were temporary. In others, clients have found that the ongoing utilization of CES resources provides the best balance between maintaining compliance and managing costs.

Contact Us

To discuss how we can help you launch or further develop your company EHS program, contact us at 609-306-0746 to request a complementary meeting with an experienced member of our team.

For more information, visit our website at www.ces-ehs.com or email us at info@ces-ehs.com.

- Stormwater & Surface Water
- Storage Tanks
- Wastewater Discharge

Contingency Planning

- SPCC and DPCC Plans
- Stormwater Management
- HazMat Management
- Integrated Response Plans

Facility Environmental Health and Safety

- Hazard Communication
- Laboratory Safety
- Lab Optimization and Process Design
- Industry-specific EHS Training
- Chemical Hygiene Plans
- Biosafety Plans & Risk Assessments
- Exposure Evaluations

Facility Operations

- Energy Audits
- Commissioning / Decommissioning
- Facility Management

About Corporate Environmental Services Inc.

Approach

As with any consulting firm, the quality of services delivered, and the effort devoted to understanding the client's current and long-term needs and priorities are largely determined by the individual assigned to a project.

At CES, all assignments are completed by a senior level engineer or scientist with a personal stake in the success of each project and the client. This ensures that CES is providing its clients larger firm knowledge and experience at competitive rates.

CES assists our clients in proactively managing risks & hazards to create long-term business value by integrating EHS management systems into overall business strategy.

We believe that once you have experienced this difference you will become an ongoing client of CES.

Representative Clientele

WuXi Biologics	PPL (nationwide – multiple sites)

Key Personnel

Frank S. Jankoski is the founder and President of CES. A Rutgers graduate with degrees in Chemical Engineering and Economics, Frank has been providing environmental consulting services to public and industrial clients for 30+ years. His expertise includes:

- EHS compliance strategies
- Coordinating complex permitting efforts
- Facility operations, lab startups, commissioning, and decommissioning

Shannon J. Busby, Senior Project Manager, has 25 years' experience as an EHS consultant and project manager. He has developed a wide variety of EHS programs to meet clients' goals and achieve compliance with state and federal regulations via a mix of hand-on and remote support. Shannon's recent focus has been building complex EHS management systems for CRDMOs and Life Science Organizations in PA and NJ.

Lindsey Adams, EHS Specialist, has several years of experience in municipal government, namely in freshwater and drinking water analysis, and wastewater compliance. Her main environmental focus is industrial regulatory compliance; however, she also enjoys the fields of sustainability, urban gardening, and data analysis.

Dr. Sunil Hangal, Associate, has extensive experience in air permitting, compliance and analysis. Areas of expertise include air quality, greenhouse gas inventory assessment and management, risk management planning, source sampling and emissions control technology, pollution prevention, environmental health and safety compliance management, environmental impact assessment/site investigation, wastewater, solid & hazardous waste management, environmental management systems, sustainability, and environmental health & safety compliance and auditing.
